Banda Aceh, Indonesia

Software Engineer with 2+ years of experience in full stack development, frontend, backend, and AI engineering. Skilled in TypeScript, Next.js, Go / Golang, Express.js, FastAPI, Python, Flutter, PostgreSQL, and MySQL. Experienced in building RAG architectures and LLM-powered applications with strong technical leadership and collaboration skills

Education Level

Universitas Syiah Kuala - Banda Aceh, Indonesia <i>Bachelor of Informatics (Computer Science), 3.51/4.00</i>	Aug 2022 - Jun 2026
- Head of Student Welfare Management Department at HMIF USK, leading strategic programs across 2 divisions. - Teaching Assistant for core courses: Software Architecture and DevOps. - National IT competition finalist, and developer of grant-funded community tech solutions.	

Work Experiences

Digital Health Research Team (USK) - Banda Aceh, Indonesia <i>Software Engineer, Contract, Professional</i>	Jun 2026 - Present
- Engineered DSMES Aceh, a digital health ecosystem for diabetes education and clinic monitoring. - Implemented interactive patient education modules, biometric health logging, and real-time telemetry dashboards for staff to track user adherence and usage metrics. - Built multi-tier architectures using Go (Fiber), Flutter, Next.js 16, PostgreSQL, and Docker. - Technology: Go / Golang, Fiber, Flutter, Dart, Next.js, TypeScript, PostgreSQL, Docker, Clean Architecture	
Dinas Komunikasi, Informatika dan Persandian Aceh - Banda Aceh, Indonesia <i>AI Engineer, Internship, Professional</i>	Aug 2025 - Sep 2025
- Engineered LawChain, a RAG legal AI providing intuitive access to UUD 1945 using FastAPI. - Integrated local LLMs (Gemma 2 & LLaMA 3 via Ollama) achieving zero hallucination on legal queries. - Deployed production pipelines on-site, enabling automated internal legal document retrieval. - Technology: TypeScript, Next.js, Python, FastAPI, LangChain, Ollama, LLaMA 3, Gemma 2, RAG Architecture	
Universitas Syiah Kuala - Banda Aceh, Indonesia <i>Full Stack Developer, Contract, Professional</i>	Aug 2025 - Dec 2025
- Launched BUKADITA, a PWA Posyandu platform digitizing health records for 50+ local cadres. - Secured PKMBP-TTG National Grant funding through cross-faculty Nursing & FMIPA collaboration. - Implemented multi-tier Role-Based Access Control (RBAC) for cadres, admins, and stakeholders. - Technology: TypeScript, Next.js, Express.js, Node.js, PWA, PostgreSQL	
Coding Camp by DBS Foundation - Jakarta, Indonesia <i>Front-End and Back-End Developer, Cohort, Remote</i>	Feb 2025 - Jul 2025
- Selected out of 63,356 applicants (Top 4.7%) for the national full-stack developer program. - Engineered PurrPal, an AI pet healthcare platform using Next.js and Express.js in a 5-member team. - Integrated Gemini AI for real-time consultations, scoring 95+ Lighthouse and Top 20 of 398 teams. - Technology: TypeScript, Next.js, Node.js, Express.js, Gemini AI, GCP	
Himpunan Mahasiswa Informatika USK (HMIF) - Banda Aceh, Indonesia <i>Head of Student Welfare Management Department, Seasonal, Organization</i>	Feb 2025 - Mar 2026
- Managed 14 members across Student Aspirations & Women Empowerment divisions in Beyond Cabin - Delivered 12 strategic programs enhancing engagement among students, alumni, and faculty admins	

Projects

EcoMaggie / Innovilage (Telkom Indonesia) <i>Freelance Project / Client Project</i>	
- Built EcoMaggie, a PWA circular economy platform connecting organic waste suppliers with BSF maggot farmers. - Integrated Midtrans Payment Gateway, Biteship multi-courier API, and WhatsApp Business API for automated alerts.	

- Selected as a Top 50 Finalist in the Innovillage National Social Innovation Program and secured project funding.
- Technology: TypeScript, Next.js 16, Supabase, Tailwind CSS, PWA, Midtrans API

ADAPTIVIN / Kemendikbudristek (LIDM 2025)

Competition Project (Top 20 National Finalist)

- Engineered a rule-based adaptive engine adjusting difficulty (Level 1-5) based on performance & laten
- Integrated Gemini AI for personalized recommendations and field-tested system at SDN 16 Banda Aceh
- Selected as Top 20 National Finalist in ITDP Division at LIDM 2025 organized by BPTI/Kemendikbudristek
- Technology: TypeScript, Next.js 15, Node.js, Express.js, Firestore, Supabase, Gemini AI

VELORA / INFINITERA 1.0

Competition Project (2nd Place Winner)

- Engineered a maternal risk classifier (84% accuracy) for High, Medium, & Low risk detection via Scikit-Learn
- Built FastAPI backend endpoints & Streamlit dashboard digitizing traditional maternal health tracking (Buku KIA)
- Awarded 2nd Place Winner at the INFINITERA 1.0 National Web Programming Competition
- Technology: Python, FastAPI, Streamlit, Scikit-Learn, Pandas, Next.js, Express.js

GAJIBERSIH / INFEST XI

Competition Project (Top 10 National Finalist)

- Integrated OpenAI API for automated scanning of contract documents (PDF/DOCX) to identify labor risk
- Built a financial engine calculating net take-home pay factoring in BPJS and PPh21 tax compliance
- Selected as Top 10 National Finalist in the INFEST XI National Hackathon Competition
- Technology: TypeScript, Next.js, Express.js, Node.js, OpenAI API

Achievements and Skills

- **2nd Place Winner in INFINITERA 1.0 National Web Programming Competition** 🏆 (2025): Engineered VELORA, an AI-powered maternal health ecosystem achieving 84% risk prediction accuracy using Scikit-Learn ML models. Built a FastAPI backend and Streamlit dashboard digitizing physical health tracking (Buku KIA) into a modern mobile-friendly digital experience.
- **Top 20 National Finalist in LIDM 2025 (Kemendikbudristek / BPTI)** 🏆 (2025): Developed ADAPTIVIN, a rule-based adaptive learning platform with a Level 1-5 difficulty recommendation engine and Gemini AI integration. Field-tested the system at SDN 16 Banda Aceh, validating a significant increase in student engagement and formative assessment accuracy.
- **Top 20 Best Capstone Team in DBS Foundation Coding Camp** 🏆 (2025): Served as Lead Front-End Developer for PURRPAL, an AI-powered pet healthcare platform selected as Top 20 out of 398 national teams from 63,356 applicants. Architected mobile-first user interfaces using Next.js & TypeScript, integrated Gemini AI consultations, and achieved a 95+ Lighthouse performance score.
- **Top 10 National Finalist in INFEST XI National Hackathon** 🏆 (2025): Developed GAJIBERSIH, a legal-tech platform using OpenAI API for automated PDF/DOCX contract scanning and risk identification. Engineered a financial engine for net salary calculation compliant with Indonesian labor regulations (BPJS & PPh21)
- **Hard Skills** : Go / Golang, Fiber, TypeScript, JavaScript, Python, Node.js, Express.js, FastAPI, Next.js, Flutter, React, RESTful API, PostgreSQL, MySQL, Supabase, Docker, GCP, GitHub Actions, RAG Architecture, LangChain, Ollama, LLaMA 3, Gemma 2, OpenAI API, Gemini AI
- **Soft Skills**: Technical Leadership, Cross-Functional Collaboration, Problem Solving, Project Management, Team Mentorship
- **Languages**: Indonesian (Native), English (Professional Working)
