Summary

Full Stack Developer with **1.5+ years** of experience in full-stack development roles at Universitas Syiah Kuala and as an AI Engineer Intern at Diskominsa Aceh. Successfully delivered **8+ software projects** across education, healthcare, and government, with achievements in national technology competitions.

Technical Skills

Languages: TypeScript, JavaScript, Go, Java, Python, SQL, Dart
Frontend and Mobile: Next.js, React, Flutter, Tailwind CSS, Progressive Web Apps (PWA)
Backend: Fiber, Express.js, Spring Boot, Reactor Netty, FastAPI, Node.js, REST APIs
Data: PostgreSQL, Redis, Supabase
DevOps: Docker, GitHub Actions, Git, GCP

Work Experience

Full Stack Developer (Research Project) Jul 2026–Present
Universitas Syiah Kuala, Banda Aceh *Contract through Dec 2026*

- Developed DIBA (Diabetes Behaviour & Adherence Application), comprising a Flutter patient app, Next.js clinical dashboard, and Go/Fiber REST API to support patient data management and clinical monitoring.
- Translated research requirements into blood-glucose tracking, educational content, questionnaires, and patient monitoring workflows for a planned **one-month pilot** to evaluate research outcomes with **30 patients at Puskesmas Ulee Kareng**.
- **Technology:** Go, Fiber, Flutter, Dart, Next.js, TypeScript, PostgreSQL, Docker, GitHub Actions

Full Stack Developer (Community Service Grant Project) Aug 2025–Dec 2025
Universitas Syiah Kuala, Banda Aceh *Contract*

- Developed BUKADITA, a digital educational handbook for Posyandu health workers in Kopelma Darussalam, providing accessible learning materials, interactive quizzes, and progress tracking to support community health training.
- Implemented offline-capable PWA caching and role-based learning workflows; usability testing with **22 respondents** achieved a **93.87% average USE Questionnaire score**.
- **Technology:** TypeScript, Next.js, Express.js, Supabase, PWA

AI Engineer Intern Aug 2025–Sep 2025
Dinas Komunikasi, Informatika dan Persandian Aceh, Banda Aceh *Internship*

- Designed and developed **LawChain**, a local AI-powered legal chatbot enabling users to ask questions about Indonesia's 1945 Constitution and receive contextual answers with relevant legal references.
- Implemented and evaluated **two RAG architectures** across **7 test scenarios (5 passed, 2 partially passed)**, finding that LangChain provided more reliable legal references, while Native RAG offered lower response latency and greater flexibility.
- **Technology:** Python, FastAPI, Next.js, TypeScript, LangChain, FAISS, Ollama, Gemma2:2b, Nomic Embeddings, PyMuPDF, Tailwind CSS.

Assistant Lecturer — Software Architecture, DevOps & Software Quality Sep 2025–Jun 2026
Universitas Syiah Kuala, Banda Aceh *Contract*

- Mentored 30+ students in Software Architecture, 30+ in DevOps, and 66 in Software Quality across two classes (**126+ course participations** total).
- Guided UML/OCL modeling, design patterns, and architectural decisions; helped all DevOps teams complete and deploy final projects with automated CI/CD pipelines.
- Guided software quality evaluation using ISO/IEC 25010, McCall, Boehm, Dromey, and FURPS, plus API and automated API testing with Postman.
- **Technology:** UML, OCL, Git, GitHub Actions, Docker, GCP, Postman

Selected Projects

EcoMaggie | **ecomaggie.com** Jan 2026–Mar 2026
Full Stack Developer — Freelance Client Project

- Developed a circular-economy marketplace for a client, connecting organic waste producers with BSF maggot farmers to facilitate waste collection and the sale of maggot farming products.
- **Technology:** TypeScript, Next.js, Supabase, Midtrans API, Biteship API, PWA

Distributed API Gateway | **GitHub** 2026
Backend Developer — Personal Project

- Designed and developed an API gateway to centralize client-to-microservice communication, featuring dynamic routing, Redis-backed rate limiting, load balancing, and runtime configuration updates. Validated rate limiting through **2,400 HTTP requests over 120 seconds**, with **1,796 requests correctly rate-limited**.
- **Technology:** Java 21, Reactor Netty, Spring Boot, Redis, PostgreSQL, Docker, Prometheus, Grafana

VELORA | **GitHub** 2025
Full Stack Developer & ML Engineer — Team Project

- Created a digital maternal health platform inspired by Indonesia's KIA handbook, offering pregnancy education, machine learning-based risk prediction through health questionnaires, and a community space for expectant mothers; won **2nd place** at INFINITERA 1.0.
- **Technology:** TypeScript, Next.js, Express.js, Supabase, PostgreSQL, Python, FastAPI, Scikit-Learn

ADAPTIVIN | **GitHub** 2025
Frontend Developer & AI Engineer — Team Project

- Implemented adaptive mathematics learning features for elementary students at SDN 16 Banda Aceh, including personalized quizzes, AI-powered study recommendations, and teacher progress monitoring to identify learning difficulties; ranked among the **Top 20 national finalists** at LIDM 2025.
- **Technology:** TypeScript, Next.js, React, Supabase, Gemini AI

Education & Training

Bachelor of Informatics (Computer Science) Aug 2022–Jun 2026
Universitas Syiah Kuala, Banda Aceh ***GPA 3.51/4.00***

Coding Camp powered by DBS Foundation Feb 2025–Jul 2025
Front-End & Back-End Development Program (training) *Remote*

- Completed a six-month Front-End & Back-End development program; led the frontend team for PurrPal's five-person capstone, building its Next.js interface and integrating backend APIs. The product scored **above 95 on Lighthouse**, and the team placed in the **top 20 of 398 teams**.

Leadership & Organizations

Head of Student Welfare Management Department Feb 2025–Mar 2026
Himpunan Mahasiswa Informatika USK (HMIF) *Banda Aceh*

- Led **14 members** across the Student Aspirations and Women Empowerment divisions and successfully delivered **12 work programs** for students, alumni, and faculty.

Achievements & Certifications

- **2nd Place**, INFINITERA 1.0 National Web Programming Competition (2025) – Certificate
- **4th Place**, INFEST XI National Hackathon, GAJIBERSIH (2025) – Certificate
- **Top 20 National Finalist**, LIDM ITDP, ADAPTIVIN (2025) – Certificate
- **Top 20 Capstone Team**, DBS Foundation Coding Camp (2025) – Certificate
- Dicoding, Belajar Back-End Pemula dengan JavaScript (2025) – Verify
- Dicoding, Belajar Fundamental Front-End Web Development (2025) – Verify
- Dicoding, Belajar Pengembangan Web Intermediate (2025) – Verify
- Assistant Lecturer certificates: Software Architecture, DevOps, Software Quality
